CONTENTS

Vol. XLIV, Issue Nos. 143–144

Journal of Polymer Science

ISSUE No. 143, MAY

R. E. NAYLOR, JR., and S. W. LASOSKI, JR.: Nuclear Magnetic Resonance Spectra of Some Fluorine-Containing Polymers..... 1

HENRY C. BROWN: Thermally Stable Polymers from Condensation Polymerization of Perfluoroalkylamidines..... 9

A. E. WOODWARD, J. M. CRISSMAN, and J. A. SAUER: Investigations of the Dynamic Mechanical Properties of Some Polyamides.... 23

SHO ASAKURA, MICHIKI KASAI, and FUMIO OOSAWA: The Effect of Temperature on the Equilibrium State of Actin Solutions... 35

MICHIKI KASAI, HIROTAKA KAWASHIMA, and FUMIO OOSAWA: Structure of F-Actin Solutions..... 51

C. C. HSIAO: Flow Orientation and Fracture Strength of a Model Linear Hard Polymer Solid..... 71

W. H. BEATTIE and C. BOOTH: Tables of Light-Scattering Functions for Polymers..... 81

SHIZUO FUJIWARA: Proton Magnetic Resonance in Irradiated and Unirradiated Polyvinyl Alcohol..... 93

JOSEPH ZIMMERMAN: Molecular Weight Distributions of Vinyl Polymers Grafted to a Solid Polymeric Substrate by Irradiation (Theoretical)..... 107

B. BAYSAL, G. ADLER, D. BALLANTINE, and P. COLOMBO: Solid State Polymerization of Acrylamide Initiated by Gamma Radiation.. 117

HERMAN L. MARDER and CONRAD SCHUERCH: Sequence Length Distributions in Vinylene Carbonate–Vinyl Acetate Copolymers 129

H. S. GUTOWSKY, ROBERT A. BERNHEIM, and HAROLD TARKOW: Measurement of Internal Stresses by Radiofrequency Spectroscopy..... 143

W. P. COX, R. A. ISAKSEN, and E. H. MERZ: Dynamic Mechanical Measurement of $\bar{M}_n$..... 149

R. F. FISCHER: Polyesters from Epoxides and Anhydrides..... 155

F. A. BOVEY and G. V. D. TIERS: Polymer NSR Spectroscopy. II. The High Resolution Spectra of Methyl Methacrylate Polymers Prepared with Free Radical and Anionic Initiators..... 173

E. GLEASON and V. STANNETT: Oxidation and Grafting of Benzyl and Ethyl Cellulose..... 183

Y. SHINOHARA and K. TOMIOKA: Graft Copolymerization by a Preirradiation Method..... 195

IVO KÖSSLER and MILAN ŠTOLKA: Thermodiffusion Distribution Curve of Polychloroprene..... 213

AKIHISA MIYAKE: Infrared Spectra and Crystal Structures of Polyamides 223
AVERY A. MORTON and EDWARD J. LANPHER: Stepwise and Catalytic Polymerization of Butadiene by Organosodium Reagents 233
B. M. E. VAN DER HOFF: On the Mechanism of Emulsion Polymerization of Styrene. II. Polymerizations in Soap Solutions Below and Above the Critical Micelle Concentration and Some Remarks on the Kinetics of Emulsion Polymerization 241

LETTERS TO THE EDITORS

A. RUDIN and H. P. SCHREIBER: Time Dependence of Viscosity in Capillary Extrusion of Polyethylene 261
RAYMOND J. KRAY: Polymerization of Vinyl Ethers by Grignard Compounds 264
RICHARD F. GROSSMAN: Cracking in Stressed Rubber 266
HIROYUKI TADOKORO, TAKAYA YASUMOTO, SHUNSUKE MURAHASHI, and ISAMU NITTA: Molecular Configuration of Polyoxymethylene 266

NOTES

RICHARD A. MOCK: Concerning Experimental Determination of Solute Activity in Aqueous Polyelectrolyte Solutions 271
R. J. KERN and H. G. HURST: The Reaction Between Triethylaluminum and Titanium Tetrachloride 272
HIROSHI SOBUE and YONEHO TABATA: Temperature Dependence on Degree of Crystallinity of Isotactic Polypropylene 275

ERRATA

CHARLES C. PRICE: Some Relative Monomer Reactivity Factors (article in *J. Polymer Sci.*, **3**, 772–775, 1948) 279
JOHN C. LIGHT and ANTHONY T. SANTONICOLA: The Kinetics of Emulsion Polymerization of Vinylidene Chloride (article in *J. Polymer Sci.*, **36**, 549–551, 1959) 279

Abstracts from *High Molecular Weight Compounds* (*Vysokomolekulyarnye Soedineniya*), Volume I, Issue 11, November 1959 281

ISSUE NO. 144, JUNE

C. S. MARVEL, DAVID M. PAISLEY, GHAZI M. A. KHATTAB, W. G. BICKFORD, and SARA P. FORE: Polymerization Reactions of the Acrylate and Methacrylate Esters of Alcohols from Jojoba Oil 289
I. S. UNGAR, W. B. GAGER, and R. I. LEININGER: Electron Spin Resonance Spectra of Polymethyl Methacrylate and Polyethyl Methacrylate 295
DONALD M. SIMONS and JOHN J. VERBANC: The Polymerization of Propylene Oxide 303
LEO A. WALL and SIDNEY STRAUS: Pyrolysis of Polyolefins 313
DANIEL W. BROWN and LEO A. WALL: Halobenzenes as Sensitizers for the Radiation-Induced Polymerization of Styrene 325

BILLY R. LOY: Electron Spin Resonance Studies of Free Radical Decay in Gamma-Irradiated Polyethylene 341
B. G. RÅNBY, F. F. MOREHEAD, and N. M. WALTER: Morphology of *n*-Alkanes, Linear Polyethylene, and Isotactic Polypropylene Crystallized from Solution 349
JOE H. GRIFFITH and B. G. RÅNBY: Dilatometric Measurements on Poly(4-methyl-1-pentene) Glass and Melt Transition Temperatures, Crystallization Rates, and Unusual Density Behavior 369
KENNETH A. KUN and HAROLD G. CASSIDY: Electron Exchange Polymers. XIV. Steric Hindrance in the Chemical Modification of High Polymers 383
ROBERT L. MILLER and LAWRENCE E. NIELSEN: Crystallographic Data for Various Polymers 391
GLENN D. COOPER and MAURICE PROBER: The Action of Oxygen Corona and of Ozone on Polyethylene 397
ROGER K. GRAHAM, JOHN R. PANCHAK, and MARY J. KAMPF: Nonterminated Polymeric Anions: The Initiation of Polymerization of Certain Polar Monomers 411
M. BACCAREDDA and E. BUTTA: Isophasic Transitions in Polytrifluorochloroethylene 421
D. HEIKENS and P. H. HERMANS: On the Mechanism of Polymerization of ε-Caprolactam in the Presence of Water. III. Supplementary Remarks on a Previous Paper. Introduction of Volume Correction 429
D. HEIKENS, P. H. HERMANS, and G. M. VAN DER WANT: On the Mechanism of the Polymerization of ε-Caprolactam. IV. Polymerization in the Presence of Water and Either an Amine or a Carboxylic Acid 437
P. H. GEIL: Nylon Single Crystals 449
JOHN F. RUDD: The Effect of Molecular Weight Distribution on the Rheological Properties of Polystyrene 459
E. P. HARDY, JR., and J. STEIGMAN: The Concentration Dependence of the Self-Diffusion Coefficients of Strontium Ion in Aqueous Polystyrenesulfonic Acid Solutions 475
A. E. BORCHERT and C. G. OVERBERGER: The Use of Infrared Spectra in the Preparation and Characterization of Vinylcycloalkanes 483
C. G. OVERBERGER, A. E. BORCHERT, and A. KATCHMAN: Crystalline Polyvinylcyclopropane, Polyvinylcyclopentane, and Polyvinylcyclohexane 491
J. M. H. FORTUIN: Theory and Application of Two Supplementary Methods of Constructing Density Gradient Columns 505
F. RYBNIKÁŘ: Secondary Crystallization of Polymers 517
JOGINDER LAL, E. F. DEVLIN, and G. S. TRICK: Effect of Type of Catalyst on Structure of Poly(β-Vinyloxyethyl Methacrylate) .. 523
RONALD M. PIKE and RONALD A. COHEN: Organophosphorus Polymers. I. Peroxide-Initiated Polymerization of Diethyl and Diisopropyl Vinylphosphonate 531
L. C. CERNY, T. E. HELMINIAK, and J. F. MEIER: Osmotic Pressures of Aqueous Polyvinylpyrrolidone Solutions 539

LETTERS TO THE EDITORS

BERNARD ROSEN: Time-Dependent Tensile Properties. Part I. A Unified Perspective 547

C. Y. LIANG, M. R. LYTTON, and C. J. BOONE: Infrared Spectra of Crystalline Polymers from Deuterated Propylenes 549
JEROME GOODMAN: The Formation of Thin Polymer Films in the Gas Discharge 551

SUBJECT INDEX, VOLUME XLIV

Acrylamide, solid state polymerization, 117
Acrylate esters, of jojoba oil alcohols, polymerization, 289
Actin, solutions, effect of temperature on equilibrium, 35
  solution structure, 51
n-Alkanes, morphology, 349
Anions, polymeric, nonterminated, 411
Benzyl cellulose, oxidation and grafting, 183
Butadiene, polymerization catalyzed by organosodium reagents, 233
Capillary extrusion, polyethylene, 261
ε-Caprolactam, polymerization in presence of water, 429, 437
Catalyst, effect of type on poly-β-vinyloxyethyl methacrylate structure, 523
  organosodium, for butadiene polymerization, 233
Condensation polymerization, perfluoroalkylamidines, 9
Cracking, stressed rubber, 266
Crystallinity, isotactic polypropylene, dependence on temperature, 275
  nylon single crystals, 449
Crystallization, poly-4-methyl-1-pentene, rate, 369
  secondary, polymers, 517
Crystallographic data, for polymers, 391
Crystal structure, polyamides, 223
Density, poly-4-methyl-1-pentene, 369
Density gradient columns, construction, 505
Deuterated propylene polymers, crystalline, infrared spectra, 549
Diethyl vinylphosphonate, peroxide-initiated polymerization, 531
Diisopropyl vinylphosphonate, peroxide-initiated polymerization, 531
Dynamic mechanical measurement of $\bar{M}_n$, 149
Dynamic mechanical properties, polyamides, 23
Electron exchange polymers, 383
Electron spin resonance, polyethylene, free radical decay, 341
  polymethyl and polyethyl methacrylates, 295
Emulsion polymerization, styrene, mechanism, 241
  vinylidene chloride, kinetics, 288
Ethyl cellulose, oxidation and grafting, 183
F-actin, structure of solutions, 51
Films, thin, polymer, formation in gas discharge, 551
Flow orientation, linear hard polymer solid, 71
Fluorine-containing polymers, nuclear magnetic resonance spectra, 1
Fracture strength, linear hard polymer solid, 71
Free radical decay, in gamma-irradiated polyethylene, 341
Gamma irradiation, as acrylamide polymerization initiator, 117
Glass transition temperature, poly-4-methyl-1-pentene, 369
Graft copolymerization, preirradiation method, 195
Grafting, benzyl and ethyl cellulose, 183
Grignard compounds, for polymerization of vinyl ethers, 264
Halobenzenes, as sensitizers for radiation-induced polymerization of styrene, 325
Infrared spectra, deuterated propylene polymers, 549
  polyamides, 223
  vinylcycloalkanes, 483
Initiation, polymerization of polar monomers, 411
  free radical and anionic, for methyl methacrylate polymerization, 173
Initator, gamma radiation as, for acrylamide polymerization, 117
  peroxide as, for polymerization of vinylphosphonates, 531
Irradiation, effect on polyvinyl alcohol proton magnetic resonance, 93
  for grafting of vinyl polymers, 107
Isotactic polypropylene, crystallinity dependence on temperature, 275
  morphology, 349
Jojoba oil alcohols, acrylate and methacrylate esters, polymerization, 289
Light-scattering functions, polymers, tables, 81
Linear polymer solid, flow orientation and fracture strength, 71
Melt transition temperature, poly-4-methyl-1-pentene, 369
Methacrylate esters, of jojoba oil alcohols, polymerization, 289
Methyl methacrylate polymers, NSR spectra, 173
Molecular configuration, polyoxymethylene, 266
Molecular weight distribution, polystyrene, effect on rheological properties, 459
  vinyl graft polymers, 107
Morphology, *n*-alkanes crystallized from solution, 369
Nonterminated polymeric anions, 411
Nuclear magnetic resonance spectra, fluorine-containing polymers, 1
Nuclear spin resonance spectroscopy, methyl methacrylate polymers, 173
Number-average molecular weight, dynamic mechanical measurement, 149
Nylon, single crystals, 449
Organophosphorus polymers, 531

Organosodium reagents, in polymerization of butadiene, 233
Osmotic pressure, polyvinylpyrrolidone aqueous solutions, 539
Oxidation, benzyl and ethyl cellulose, 183
Oxygen corona, effect on polyethylene, 397
Ozone, effect on polyethylene, 397
Perfluoroalkylamidines, condensation polymerization, 9
Phase separation, mixed polymer solutions, 558
Polyamides, dynamic mechanical properties, 23
  infrared spectra and crystal structure, 223
Polychloroprene, thermodiffusion distribution curve, 213
Polyelectrolyte, aqueous solutions, determination of solute activity, 271
Polyesters, from anhydrides and epoxides, 155
Polyethylene, effect of oxygen corona and ozone on, 397
  gamma-irradiated, electron spin resonance, 341
  linear, morphology, 349
  viscosity in capillary extrusion, 261
Polyethyl methacrylate, electron spin resonance spectra, 295
Polymer films, formation in gas discharge, 551
Polymers, crystallographic data, tables, 391
  fluorine-containing, nuclear magnetic resonance spectra, 1
  light-scattering functions, tables, 81
  secondary crystallization, 517
  steric hindrance in chemical modification, 383
  thermally stable, from perfluoroalkylamidines, 9
Polymethyl methacrylate, electron spin resonance spectra, 295
Poly-4-methyl-1-pentene, glass and melt transition temperatures, crystallization rates, and density behavior, 369
Polyolefins, pyrolysis, 313
Polyoxymethylene, molecular configuration, 266
Polypropylene, isotactic, morphology, 369
  temperature dependence of degree of crystallinity, 275
Polystyrene, molecular weight distribution effect on rheological properties, 459
Polystyrenesulfonic acid, aqueous solutions, diffusion of strontium ions in 475
Polytrifluorochloroethylene, isophasic transitions, 421
Polyvinyl alcohol, proton magnetic resonance, 93
Polyvinylcyclohexane, crystalline, 491
Polyvinylcyclopentane, crystalline, 491
Polyvinylcyclopropane, crystalline, 491
Poly-β-vinyloxyethyl methacrylate, effect of catalyst on structure, 523
Polyvinylpyrrolidone, aqueous solutions, osmotic pressure, 539
Preirradiation, method, for graft copolymerization, 195
Propylene, deuterated crystalline polymers, infrared spectra, 549
Propylene oxide, polymerization, 303
Proton magnetic resonance, polyvinyl alcohol, 93
Pyrolysis, of polyolefins, 313
Radiofrequency spectroscopy, measurement of internal stresses, 143
Reactivity, monomers, 288
Rheological properties, polystyrene, 459
Rubber, stressed, cracking, 266
Secondary crystallization, polymers, 517
Self-diffusion coefficient, strontium ion, in aqueous polystyrenesulfonic acid solutions, 475
Sensitizers, halobenzenes as, for styrene polymerization, 325
Sequence length distribution, vinylene carbonate–vinyl acetate copolymers, 129
Solid state polymerization, acrylamide, gamma-radiation-initiated, 117
Solute activity, aqueous polyelectrolyte solutions, 271
Solutions, actin, 35, 51
  polyelectrolyte, solute activity, 271
  polystyrenesulfonic acid, strontium ion diffusion in, 475
  polyvinylpyrrolidone, osmotic pressure, 539
Steric hindrance, in chemical modification of polymers, 383
Stress, internal, measurement by radiofrequency spectroscopy, 143
Strontium ion, self-diffusion coefficient in aqueous polystyrenesulfonic acid solutions, 475
Styrene, emulsion polymerization in soap solutions, 241
  radiation-induced polymerization, 325
Tensile properties, time-dependent, 547
Thermodiffusion distribution curve, polychloroprene, 213
Titanium tetrachloride, reaction with triethylaluminum, 272
Transitions, isophasic, in polytrifluorochloroethylene, 421
Triethylaluminum, reaction with titanium tetrachloride, 272
Vinyl acetate–vinylene carbonate copolymers, sequence length distributions, 129
Vinylcycloalkanes, crystalline polymers, 491
  preparation and characterization, 483
Vinylene carbonate–vinyl acetate copolymers, sequence length distributions, 129
Vinyl ethers, polymerization by Grignard compounds, 264
Vinylidene chloride, emulsion polymerization, kinetics, 288
Vinyl polymers, grafted to polymeric substrate, molecular weight distribution, 107
Viscosity, polyethylene, time dependence in capillary extrusion, 261
